

Durga Sravani Vadlamanu

Product Engineer

✉ sravs.vadlamanu@gmail.com ☎ +919182883939 📍 Hyderabad

Profile

Mobile-focused Product Engineer with 3 years of experience building and maintaining high-scale React Native apps (300k+ install base). Strong expertise in end-to-end ownership — architecture, development, deployments, stability, security, and AWS-based serverless systems. Proven record of improving app stability and delivering secure, scalable features including SSO, notifications infrastructure, and VAPT fixes. Experienced in code reviews, technical interviews and mentoring.

Skills

Frontend: React Native, React, JavaScript, Redux, HTML/CSS

Backend: Node.js, Express.js, PHP, MySQL, REST API Design, Serverless architectures

Cloud & DevOps: AWS Lambda, SQS, SNS, EventBridge, RDS, EC2, VPC, CloudWatch, Firebase (Crashlytics, notifications)

Tools & Deployment: Google Play Console, App Store Connect, TestFlight, Xcode, Android Studio, AWS SAM, Git, GitHub, Bitbucket, Postman, Figma

Professional Experience

Product Engineer

Vaave

06/2024 – Present

hyderabad, India

- Developed a secure, encrypted Single Sign-On (SSO) solution enabling third-party applications to authenticate through Vaave, and **published a reusable NPM package** to streamline client integration.
- Built a scalable **push-notification system** using AWS Lambda, SQS, EventBridge, and Firebase FCM, supporting both real-time and scheduled notifications for a large user base; leveraged AWS SAM for efficient serverless infrastructure management and deployment.
- Led development and maintenance of the *My Alumni Network* React Native app, improving crash-free sessions from 96% to 99.87% and resolving VAPT-identified **security vulnerabilities**.
- Enhanced app stability by monitoring and addressing issues through **Firebase** Crashlytics.
- Managed release cycles for **internal** and **production** builds via Google Play Console (150k+ installs) and App Store Connect (145k+ installs), including regular dependency and library upgrades.
- Developed and maintained **PHP backend services** to support mobile app features.
- Participated in code reviews and **conducted technical interviews** to support hiring and uphold engineering quality standards.

Software Development Engineer 1

Aspire Info Labs

11/2022 – 05/2024

hyderabad, India

- Fixed bugs and implemented new features across multiple React-based client projects.
- Rebuilt a React Native application by replacing deprecated dependencies, resulting in major improvements to app performance and stability.
- Designed and developed complex features from scratch, including: A **feature-flag system** enabling OTA (over-the-air) rollout of new functionality without requiring an app release—teams can toggle features instantly by updating a single database value. A **robust coupon engine** supporting reusable, unlimited, and limited-quantity coupons; rule-based validation (minimum cart value, product-level restrictions, etc.); product-targeted promotions; and a secure **hold-time mechanism** to minimize payment-related errors.
- Mentored students in the MERN Stack program under Springboard by Infosys, guiding them through coursework and successful project completion.
- Trained and supported interns, helping them build technical proficiency and complete their internship projects; actively participated in code reviews and provided ongoing mentorship.

Education

Electronics and Communication Engineering

Rajiv Gandhi University of Knowledge and Technologies

06/2019 – 05/2023

hyderabad, India
